

JOURNAL OF SALT LAKE RESEARCH

CALLING FOR PAPERS

Briefs

Journal of Salt Lake Research is a scientific periodical of natural science which is approved by the National Science Committee, sponsored by Qinghai Institute of Salt Lakes, and published by Science press.

Our tasks are to cover and exchange the research reports, scientific papers and accomplishments on the developments of science and technology of salt lakes, underground water, gas water and other natural resources, to discuss their separation and extraction technology and comprehensive utilization channels, and to develop salt lake science for the benefit of the development of the national economy.

Main Contents of the Journal:

- ☆ Research reports and papers on geochemistry, hydro-geology, inorganic chemistry of salt-forming elements, physical chemistry, solution chemistry, and analytical chemistry of biterms covering salt lakes and other natural resources.
- ☆ Separation and extraction technology, mining and selecting technology in the exploitation of the above-mentioned resources. Achievements in the developments of new products, innovative ways and technology, novel processes and applications. And creative staged research and application reports.
- ☆ Research of inorganic materials based on solid mineral and brine resources of salt lakes and the Relevant remarks, disquisitions, investigation reports, briefs and trends.

Requirement:

1. Present your paper with clear points, good orderlines, reliable data, and simple expressive wordings.
2. Science papers, reports, remarks and disquisitions should not exceed 8 000 words in Chinese, graphs included, or no more than 16 000 letters in English with, an abstract of about 200 words attached. Also required are the title, author(s), address and 3 to 5 keywords the keywords placed after the abstract.
3. Foreign letters and equations should be distinct in their specific forms. Language and font types should be indicated for all sorts of signals and ambiguous foreign letters.
4. Illustrating graphs should not exceed 7 cm in their dimensions, the graph should be duplicate, one inserted in the article, the other put in a bag attached to the script. Tables should be in three-lined form. The contents of the graphs and tables should not be overlapped.
5. Scripts should be printed or written on 16K papers. Duplicates will be rejected. Standardized simple Chinese and punctuations are required. Quantities and units are subject to the specifications of Quantity and Unit (GB3100~3102-93).
6. Only main references are listed and with sequential coding, according to Specifications of References in Science Papers (GB7714-87), which should not include materials without being openly published. All items of a reference should be complete.
7. Please attach a brief introduction of the author with his(of her)age, sex, degree, post title, speciality, etc.
8. Articles are published with sole responsibility on the author's side. No changes and modifications are permitted after submission, once chosen, articles are subject to modest changes, If the author does not approve of modification notations are required.
9. Once published modest remunerations and two copies of the journal will be given to the author. Twice submissions are forbidden. We do not return the rejected papers, If you can not receive our letter in six months, you can deal with your paper freely.

Please send your paper by post to the following address:

Editorial Office of journal of Salt Lake Research
Qinghai Institute of Salt Lakes, Academia Sinica
18 Xinning Road
Xining China 810008
